

ran dumpdatachunks file

July 10 (3)

function executeChunkWise works.

ra Min = 10.0

ra Max = 13.0

dec Min = 30.0

dec Max = 33.0

len of objid array after calc)
and choosing rows > 2.0
↳ 23 thousand obj.

RA 180, ¹⁹⁰~~180~~
DEC 20-30
→ execute chunks takes → ~~180~~ 80 sec.
approximate value of no. of rows.

→ counter of rows and nrows attribute give different values
1435657 1421300

→ tried putting table.flush() inside loop
~~table~~ couldnot run it fully - was taking more
than 15 minutes!

→ put table.flush() with moduli 10,000 rows.
4:27 pm → 90 sec.

~~counter~~ 1430000 = nrows
1435657 = counter.

checked length of ra, dec, objid columns
by storing them in arrays.
↳ length = nrows value.
