

testfile				unique obj ID file	residual RA Array	epochs
obj ID	RA	DEC	myd	obj ID	$\Delta R_1, \Delta R_2, \Delta R_3, \Delta R_4$	[ — ]
						[ — ]
						[ — ]
						[ — ]

involves  
going over  
testfile  
4 times  
for every  
epoch

match (epochs  $\longleftrightarrow$  testfile [myd])  
 obtain obj IDs for every epoch  
 match (obj ID  $\longleftrightarrow$   $\Delta R$  values)

29/5/2015  
(4)

go over testfile once: NOT HAPPENING!

separate obj IDs acc to epochs.

match these obj IDs to unique obj ID file. & corresponding  
 $\Delta R$  &  $\Delta DEC$  values.
