

July 8, 2015/

①/

Considered the following

- Can we download the entire data from the ~~sky~~ lsd for the entire sky - at once?

↳ 81 GB data!

lot of disk space with further arrays.

②

ran on friend-all.

↳ 5 seconds - pixel tasks.

4505843 pixels.

↳ 500 sec for calc Residuals -

database storing

dat - statement

↳ couple of minutes

2:55

↓

3:04

shu running

stopped it :)

① dump lsd → make it a function.

② try SQL - check the database after you have run Calc Residuals and Pixel tasks.

for row in c.fetchone():

ra = row[0]

dec = row[1]

③ Send Kroni graphs. - png.

~~word~~ for.

friend-sample, ls.

dat statement

3.25

- wrong statements  
word run

put it in a loop.

↳ iterator
