(1)

~~my test file~~ should be

test file

'for loop' — should only run over obj within search radius

— I have not ~~separated epochs~~ checked for a ~~threshold~~ 100 days difference b/w epochs yet.

done!

Running the for loop over Searchfile.

↳ either it does not go into if & else  
just prints i all along.

↳ if it goes into 'if'

np.ndarray object has no attribute 'append'

↳ if it goes into 'else'

could not broadcast input array from shape (5)  
into shape (3).

— To get RA/Dec values within pixel

inside 2 resol. — gives approximate pixel size  
for inside — rad/arcmin.
