

Triand sample.

GRAPH PLOTTING

July 8,

(2)

↳ no. of obs > 2.0 ~~no array~~

noWith2Obs

dec

10196.

We expect that "no. of obs > 3.0"  
will be a subset of  
"no. of obs > 2.0"

no. of obs > 3.0

~~noWith3Obs~~  
decWith3Obs.

len() = 7671

↓  
a glance at the plots  
shows the contrary!  
which is bad

↓  
so we check it manually

we make a smaller func that  
takes only one objid.

func "dummy calc median and residuals" and gives residuals / medians  
and match it with those obtained  
from the huge functions.

Plot { 31.8 - 32.0 dec  
10.2 - 10.7 Ra.

↓  
problematic areas maybe.
