⟶ error in SearchRadius statement.

searchRadius = 10   in arcminutes

sphdist ( ). <= searchRadius / 60   not * !!

↳ will have to re-run the entire code again!

⟹ run the code on one machine.
   save the database and files on one machine only.

⟹.

param = packparameter list [56].

len(gal IDs)   = 1190749
len (unique gal ID in Radius) = 178.
ra Gal in Radius = raGal [index in Radius]
                                    ↓
                        index in Radius
                        = inID (gal IDs, unique(GalID
                                            in Radius)
                            ↙   ↙
                        1190749   178

see file error July 21.
              ↓
there is some issue with the
way IDs are stored in the
database
↳ many many entries that
   are exactly same !

has to match about
  ∼ 178 × 4
        ↓
      max no. of
      obs.
   ⟹ max no. of times
      a unique ID can
      appear!
